## India Implements Further Cuts to Palm Oil Duties

### 2021 Palm Oil Exports to India

Sources: Trade Data Monitor, LLC and Malaysia Palm Oil Board

India's latest import duty cut on palm oil is another effort by the government to reduce domestic oil prices and food price inflation amid soaring global palm oil prices. Effective October 14, 2021, the Indian government cut import duties on crude and refined palm oil, a move following its earlier vegetable oil duty reductions in June and September. The October cut eliminated the base import duty for crude palm oil and reduced the duty for refined palm oil to 17.5 percent through March 31, 2022. The government has also limited stocking of edible oils and oilseeds through March in an effort to discourage importers from purchasing excess supplies to market after the duty reductions expire. Effective June 30, India reduced import duties on crude palm oil from 15 to 10 percent and on refined oil from 45 to 37.5 percent; in September, it cut the duty again on crude palm oil to 2.5 percent, and on refined palm oil to 32.5 percent. The September and October cuts also apply to soybean and sunflower oil duties.

The lower duties are expected to boost India palm oil imports. Reports indicate that this series of duty reductions could benefit Indian consumers by lowering the cost of oil by 15 to 20 rupees per kilogram. Some major Indian edible oil companies have also reduced wholesale prices to provide consumers relief.

As a result, India MY 2020/21 palm oil imports are anticipated up 470,000 tons to 8.5 million and MY 2021/22 imports forecast up 300,000 tons to 8.6 million. Some global suppliers of palm oil have already increased exports to India. Following the first wave of tariff reductions, palm oil imports in August and September more than doubled from the January-July 2021 monthly average. Indonesia, the top palm oil supplier to India, has been the primary beneficiary of the increase in demand. Indonesia exporters maximized shipments ahead of their own September export tax hike on crude palm oil. Malaysia and Thailand palm oil exports to India also rose markedly in August and September.

## **PROJECTION FOR 2021/22**

Global 2021/22 oilseed production is slightly lower this month as reduced soybean production more than offsets gains in other oilseeds. Lower soybean production in Argentina and the United States is partially offset by higher production in India. Rapeseed in Iran, sunflowerseed in the EU, and cottonseed in Australia and Brazil round out the production gains. Global crush is up nearly 1 million tons on production gains. Trade is down as lower U.S. and Argentina soybean exports more than offset higher Brazil exports and lower rapeseed exports by Canada, as processors hold more of the limited supply for domestic crush. Global ending stocks are down mostly on lower soybean stocks.

Global production of protein meal is forecast higher with the larger crush expected. Protein meal trade is up primarily on higher India soybean meal exports and Canada's focus on producing and exporting rapeseed products instead of seed. Protein meal consumption is little changed overall, while stocks are up mostly on higher soybean meal stocks in Argentina and India. Global vegetable oil production is raised slightly on increased crush. Vegetable oil trade is marginally higher, though consumption is slightly lower as high vegetable oil prices continue to pressure demand. The projected U.S. season-average farm price for soybeans is down 25 cents to \$12.10 per bushel.

## **PROJECTION FOR 2020/21**

Global 2020/21 oilseed production is up 1 million tons mostly on a revision in Brazil's 2021 soybean harvest. Global oilseed trade is little changed overall. Gains in nearly all oilseed crush pushed global crush 1 million tons higher. Soybeans account for nearly half of the increase, primarily on a rebound in Argentina's September crush after 2 months of sub-par performance. Global oilseed stocks are up as higher Brazil and China soybean stocks more than offsets lower Argentina soybean stocks (as a result of higher crush).

Global protein meal production is down slightly despite larger crush on a downward revision in China's soybean meal extraction rate. Protein meal exports are marginally higher. Global consumption is down, led by reduced soybean meal consumption in China. Global protein meal stocks are up fractionally on increased soybean meal stocks in Argentina and India. Global vegetable oil production is mostly unchanged. Global vegetable oil trade is down 1 million tons mostly on lower palm oil exports, as final year trade adjustments reduced exports for Indonesia, Malaysia, and Colombia. Vegetable oil consumption is reduced marginally, contributing to a rise in ending stocks. The projected U.S. season-average farm price for soybeans is unchanged at \$10.80 per bushel.

## EXPORT PRICES

### October 2021 Soybean Export Prices

	U.S.	Argentina	Brazil
<b>October Avg Price</b>	<b>\$503/ton</b>	<b>\$541/ton</b>	<b>\$520/ton</b>
<b>Change vs September</b>	<b>-\$30/ton</b>	<b>-\$4/ton</b>	<b>-\$33/ton</b>

Source: International Grains Council. All prices are FOB: U.S. Gulf, Argentina Up River, and Brazil Paranagua.

October prices for U.S. soybeans declined on larger supplies and slower export pace. Exports were slowed by weak China demand and reduced U.S. export capacity in early October from hurricane damage. Brazil soybean prices were also down on weak China demand. Argentina soybean prices were mostly flat on decreased seasonal exports and larger supplies, offset by dry weather ahead of the 2021/22 crop planting.

### October 2021 Soybean Meal Export Prices

	U.S.	Argentina	Brazil
<b>October Avg Price</b>	<b>\$409/ton</b>	<b>\$387/ton</b>	<b>\$392/ton</b>
<b>Change vs September</b>	<b>-\$10/ton</b>	<b>-\$15/ton</b>	<b>-\$23/ton</b>

Source: International Grains Council. All prices are FOB: U.S. Gulf, Argentina Up River, and Brazil Paranagua.

Prices for U.S. soybean meal in October were down from September reflecting the downward trend in soybean prices, weaker export demand, and increased oil share in soybean value. Argentina prices were also down on lower export pace. While the average price is down, U.S. prices have diverged from South America prices in recent weeks. Increasing premiums for U.S. soybean oil have allowed U.S. processors to maintain crush margins with higher meal prices than competitors without impacting local meal demand.

### SOYBEAN MEAL EXPORT PRICES

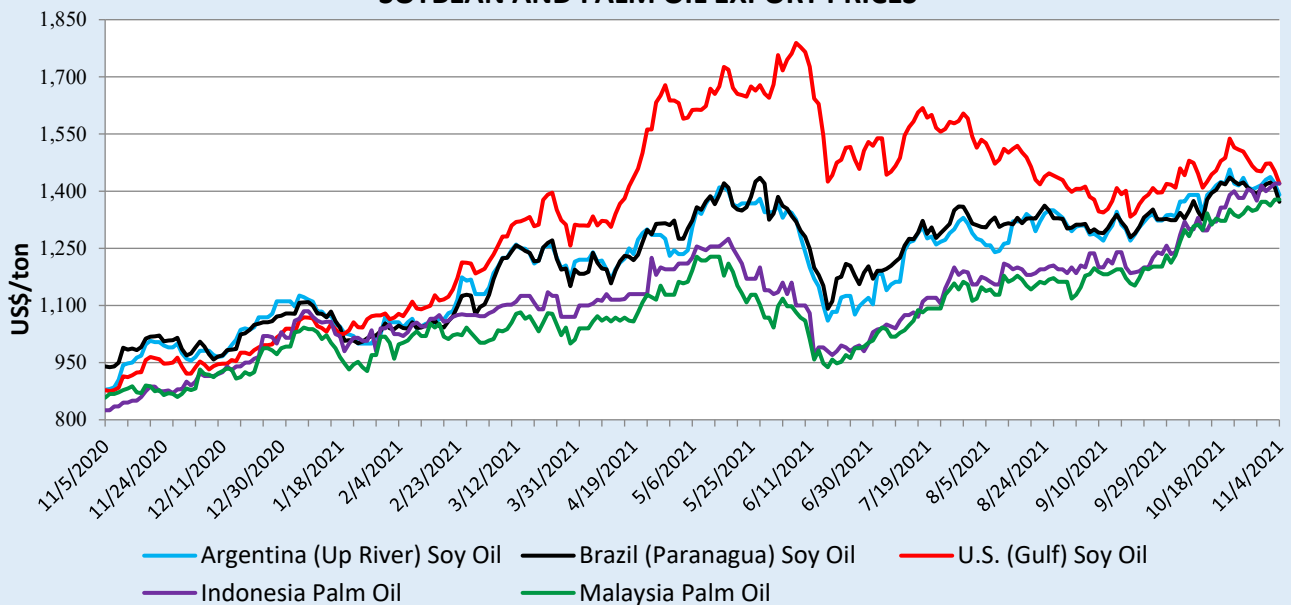

### October 2021 Soybean and Palm Oil Export Prices

<b>October Avg Price</b>	<b>\$1,464/ton</b>	<b>\$1,397/ton</b>	<b>\$1,383/ton</b>	<b>\$1,338/ton</b>	<b>\$1,316/ton</b>
<b>Change vs September</b>	<b>+ \$81/ton</b>	<b>+ \$91/ton</b>	<b>+ \$70/ton</b>	<b>+ \$125/ton</b>	<b>+ \$135/ton</b>

Soybean and palm oil prices rose sharply in October. U.S. soybean oil prices were up, tracking competing oils. Argentina soybean oil was up on tightening supplies while Brazil soybean oil prices were up on increased export demand. Global palm oil prices rose to record levels in October. Indonesia palm oil prices were up on increased demand from India and China as global export supplies remain tight. Malaysia palm oil prices rose as production and exports continued to be hampered by wet weather and labor shortages.
