Impact Expected

- Localized Flooding of roads, water logging in low lying areas and closure of underpasses mainly in urban areas.
- Occasional reduction in visibility due to heavy rainfall.
- Disruption of traffic in major cities due to water logging in roads leading to increased travel time.
- Minor damage to kutcha roads.
- Possibilities of damage to vulnerable structure.
- Localized Landslides/Mudslides/landslips/mudslips/landsinks/mudsinks.
- Damage to horticulture and standing crops in some areas due to inundation.
- It may lead to riverine flooding in some river catchments (for riverine flooding please visit Web page of CWC)

Action Suggested

- Check for traffic congestion on your route before leaving for your destination.
- Follow any traffic advisories that are issued in this regard.
- Avoid going to areas that face the water logging problems often.
- Avoid staying in vulnerable structure.

Heat wave conditions very likely in isolated pockets over Coastal Andhra Pradesh & Yanam on 06th June; Uttar Pradesh during 09th-12th June; West Rajasthan during 08th-12th June.

Alert Areas

- High temperature & increased likelihood of heat illness symptoms in people who are either exposed to sun for a prolonged period or doing heavy work.
- High health concern for vulnerable people e.g. infants, elderly, people with chronic diseases.
- Avoid heat exposure— keep cool. Avoid dehydration.
- Drink sufficient water- even if not thirsty.
- Use ORS, homemade drinks like lassi, torani (rice water), lemon water, buttermilk, etc. to keep yourself hydrated.

Agromet advisories for various parts of the country

Agromet advisories for likely impact of Heavy Rainfall

- In **Keralam**, drain out excess water from banana, coconut, black pepper and vegetables fields. Provide staking for support in banana and strengthen the pandals of vegetables.
- In **Tamil Nadu**, maintain proper drainage to prevent water stagnation rise nurseries, recently sown cumbu and

vegetables. Keep the harvested produce at safe places.

- In **Lakshadweep**, provide adequate drainage in standing crop fields to prevent waterlogging.
- In **Karnataka**, ensure proper drainage in paddy fields, arecanut and mango orchards. Keep the harvested produce in safe places. Provide staking to tomato plants.
- In **Telangana**, ensure proper drainage in orchards to prevent water stagnation and reduce fruit drop during rainy condition. Keep harvested fruits under shade and cover them with tarpaulin or plastic sheets to protect from rainwater damage.
- In **Uttarakhand**, make necessary arrangements to remove excess rainwater from the crop fields.
- In **Andaman & Nicobar Islands**, ensure proper drainage in coconut gardens and avoid water stagnation around basins.
- In **West Bengal**, ensure proper drainage in rice, sesame, jute and vegetables to avoid water stagnation. Keep already harvested produce in a safe place.
- In **Arunachal Pradesh**, ensure proper drainage in vegetable, maize, and nursery fields. In WRC paddy, keep drainage channels open to remove excess water from nursery beds. Cover newly sown nursery beds with polythene sheets or straw mulch.
- In **Assam**, ensure proper drainage arrangements for quick removal of excess water from rice nurseries, vegetables, banana, citrus and papaya fields. Keep harvested produce of *boro* rice in a safe place. Cover the rice nursery beds with thin polythene sheet.
- In **Meghalaya**, harvest the mature banana fruits immediately during clear weather. Make necessary arrangements to remove excess rainwater from the maize, ginger, cowpea, vegetable, banana and other orchard fields crop fields.
- In **Maharashtra**, undertake harvesting of mango fruits as early as possible, keep the harvested produce at safer places and provide mechanical support to newly planted orchards and vegetables in **Konkan**. In **Madhya Maharashtra**, undertake harvesting of matured summer groundnut, fruits and vegetables as early as possible and keep the harvested produce at safer places. Provide mechanical support to orchards, staking in vegetables.

Agromet advisories for likely impact of High temperatures/ Heat Waves

- In **Andhra Pradesh** -Provide light irrigation to maintain adequate moisture in standing crops such as paddy, maize, sesame, sugarcane, vegetables, and fruit orchards.

Agromet advisories for likely impact of Thunderstorm / Gusty Winds

- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.
- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

Livestock / Poultry / Fisheries

- Keep the animals inside the shed during hailstorms/ heavy rainfall and provide them with balanced feed.
- Store feed and fodder in a safe place to prevent spoilage.
- Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.
- In regions with high temperatures and heat waves, provide clean, hygienic, and ample drinking water for animals, and cover the roofs of poultry sheds with grass to reduce the adverse effects.
