Impace and Actions

Impact Expected and Action Suggested due to heavy rainfall:

- Isolated **heavy rainfall** likely over Jammu-Kashmir-Ladakh-Gilgit-Baltistan-Muzaffarabad on 12th; Andaman & Nicobar Islands during 12th-14th November.

Impact expected:

- Breaking of tree branches, uprooting of small trees like banana, papaya, drum sticks. Strong wind and rain may damage plantation, horticulture and standing crops.
- Partial damage to vulnerable structures due to strong winds and rain.
- Minor damage to kutcha houses/walls, huts and roads due to heavy rain.
- Loose objects may fly.
- Small ships, trawlers and boats may be affected.
- Road and rail traffic may be affected due to heavy rain and squally winds.
- There could be localised landslides, mudslides, landslips, water logging, inundation and flooding over low lying areas.
- Occasional reduction in visibility due to heavy rainfall.
- Helicopter services may get affected.

Action suggested:

- People are advised to keep a watch on the weather for worsening conditions and be ready to move to safer places accordingly.
- Take safe shelters; do not take shelter under trees, as there could be lightning.
- In case of expected lightning, unplug electrical/ electronic appliances, immediately, get out of water bodies and keep away from all the objects that conduct electricity.
- Tourism and recreational activities to be regulated.
- Onshore and offshore activities to be judiciously regulated.
- Helicopter services to be regulated.

Agromet advisories for various parts of the country

Agromet advisories for likely impact of Heavy Rainfall

- In **Tamil Nadu**, harvest matured paddy and groundnut during clear intervals and move the produce to safe, dry storage. In the Cauvery Delta Zone, maintain proper drainage in rice fields and remove excess water to prevent water stagnation. Store harvested banana bunches in dry places and ensure proper drainage in coconut fields. Postpone irrigation, intercultural operations, fertilizer application and plant protection sprays during rainfall.
- In **Mizoram**, continue harvesting mature upland rice and shift the harvested produce to safe, covered places. Continue sowing mustard, pea, rajma and rabi maize, and undertake potato planting and nursery sowing of early cabbage, cauliflower and broccoli only when soil and weather conditions are suitable. Leafy vegetables such as spinach, coriander and methi may be sown in well-prepared fields during suitable intervals.
- In **Meghalaya**, maintain drainage in crop fields and avoid water stagnation. Continue sowing of cole crops under suitable field conditions. Provide staking and mechanical support to tall and fragile crops such as banana, papaya, bottle gourd and pumpkin to minimise lodging during heavy rain and gusty winds. Postpone fertilizer application and plant protection sprays during rainfall.
- In **Andaman and Nicobar Islands**, ensure adequate drainage in standing crop fields and postpone irrigation, intercultural operations, fertilizer application and plant protection sprays during the rainy spell. Ensure pond outlets are clear and secure to prevent fish escape; suspend fish feeding during heavy rainfall and resume gradually after the rain subsides.

Agromet advisories for likely impact of Thunderstorm / Gusty Winds

- Shift the harvested produce in safer places or cover the produce with tarpaulin sheets in the fields. Tie the harvested crops securely and cover them to minimize the risk of displacement from strong surface winds.
- Provide mechanical support to horticultural crops and staking or support to vegetables and young fruit plants / fruit-bearing plants to avoid lodging due to strong winds.

Advisories for likely impact of Heavy Rainfall for Livestock / Poultry / Fisheries

- Keep the animals inside the shed during heavy rainfall and provide them balanced feed.
- Store the feed and fodder in a safe place to prevent spoilage.
- Construct an outlet with proper netting around the ponds to drain excess water, thereby preventing fish from escaping in the event of overflow.
